

BASS BOOSTER

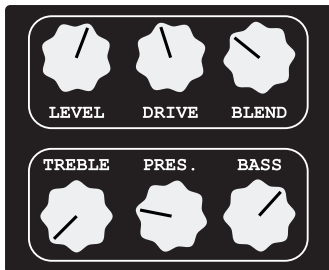

PedalTank Bass Booster offers an entire sound spectrum of the most coveted traditional bass amprigs, from vintage to modern styles. You can also obtain gnarly overdriven sounds that typically require investing in a complex system with multiple rack effects that weren't designed for bass in the firstplace.

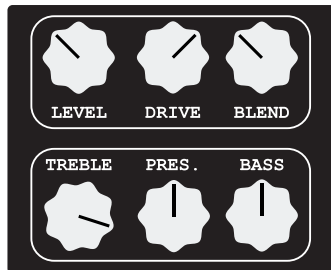

PedalTank Bass Booster functions as a pre-amp, a stomp box, controls are designed to give you the flexibility to customize your own sound.

After all, the greatest inspiration comes from having the sound that s right for you

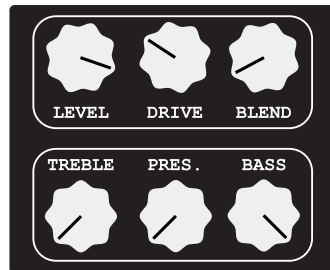

SAMPLE SETTING
