

REDBURST DISTORTION

REDBURST DISTORTION is the completely of brutal amps pedal in a box Inspiration from hige gain amplifier such as 5150, Mesa Regtifier etc. It takes a high-gain, made-for-metal pedal with a powerful 3 band EQ ensures that you can dial it in regardless of your amplifier

Dist. Control certainly brings heavy gain into play, but it goes farther than that. It lets you dial in medium crunch tones that are very responsive to your volume knob on your guitar and playing dynamics, or crank it up for a seriously powerful high-gain sound

REDBURST come with TRUE Bypass wiring footswitch ensures solid mechanical removal of the circuit when it isn't wanted, meaning you don't lose any tone when the pedal is off

DIRECTIONS

Run a cable from your guitar to the pedal Input jack and run another cable from the pedal Output jack to your amplifier.

The pedal can be powered by one 9 volt battery, PedalTank Multi DC power supply or any 9 volt DC adapter negative ground.
